One AI assistant for every payment abroad

Money Navigation

U-Hackathon 2026 · AI track · Bangkok

Who has used an ATM in Bangkok?

MANY PEOPLE ARE LOSING MONEY

33 million

foreign visitors came to Thailand in 2025. Each one pays abroad.

32,974,321 international arrivals · Ministry of Tourism and Sports, Thailand, 2025 year-end summary (1 Jan 2026)

250 THB

per ATM withdrawal with a foreign Visa card

Kasikorn Bank fee list, effective 20 May 2026

+2.6–12%

when an ATM abroad converts for you (2–5% in shops)

Stiftung Warentest 2016, as cited by BEUC (EU consumer group), 2017

It’s not someone else’s problem.

One button costs

246 THB

4,000 THB out. The ATM’s own rate adds 5.50%.

Six money jobs.
By hand.

1. Read the ATM screen
2. Check the bill
3. Haggle in Thai
4. Find cash
5. Compare rates
6. Count what’s left

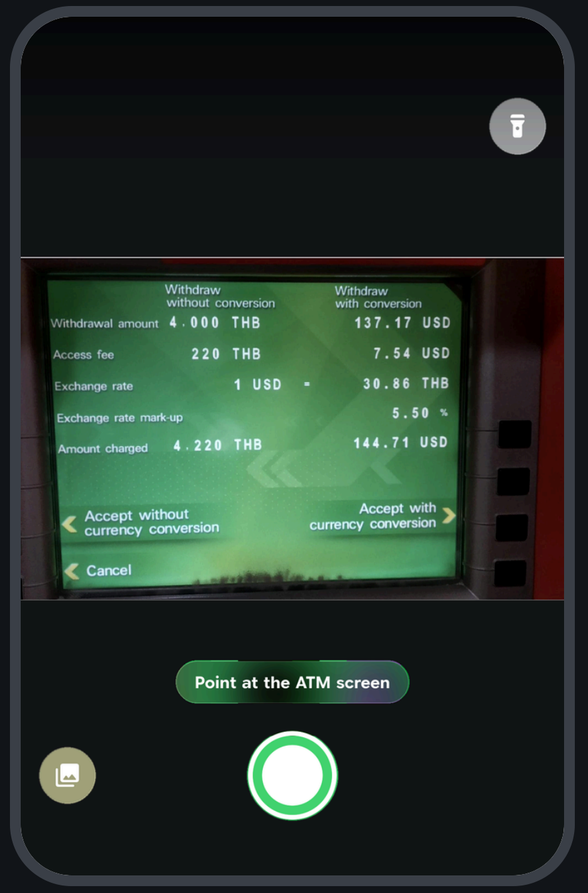

Not six apps.
One AI assistant.

THE AI READS THE ATM SCREEN

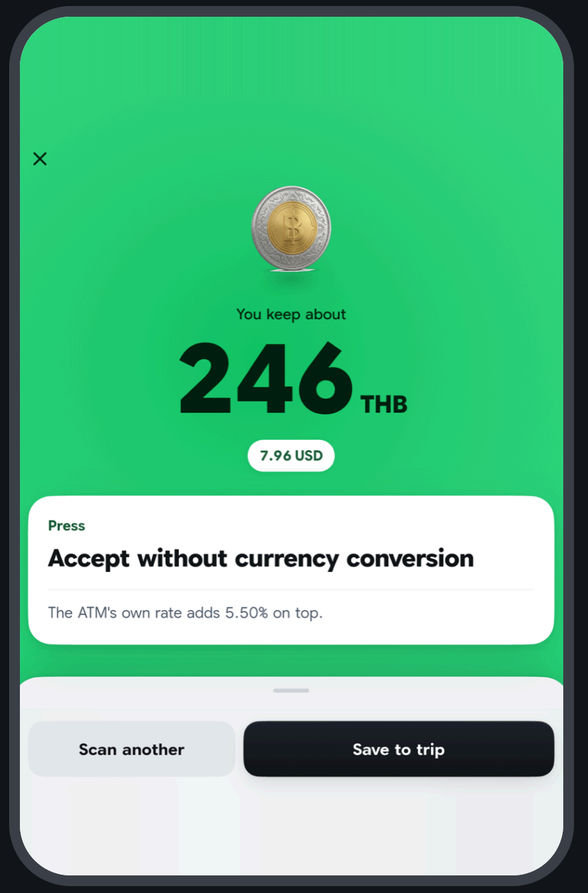

246

THB kept

Press “without conversion”.

Camera

Result

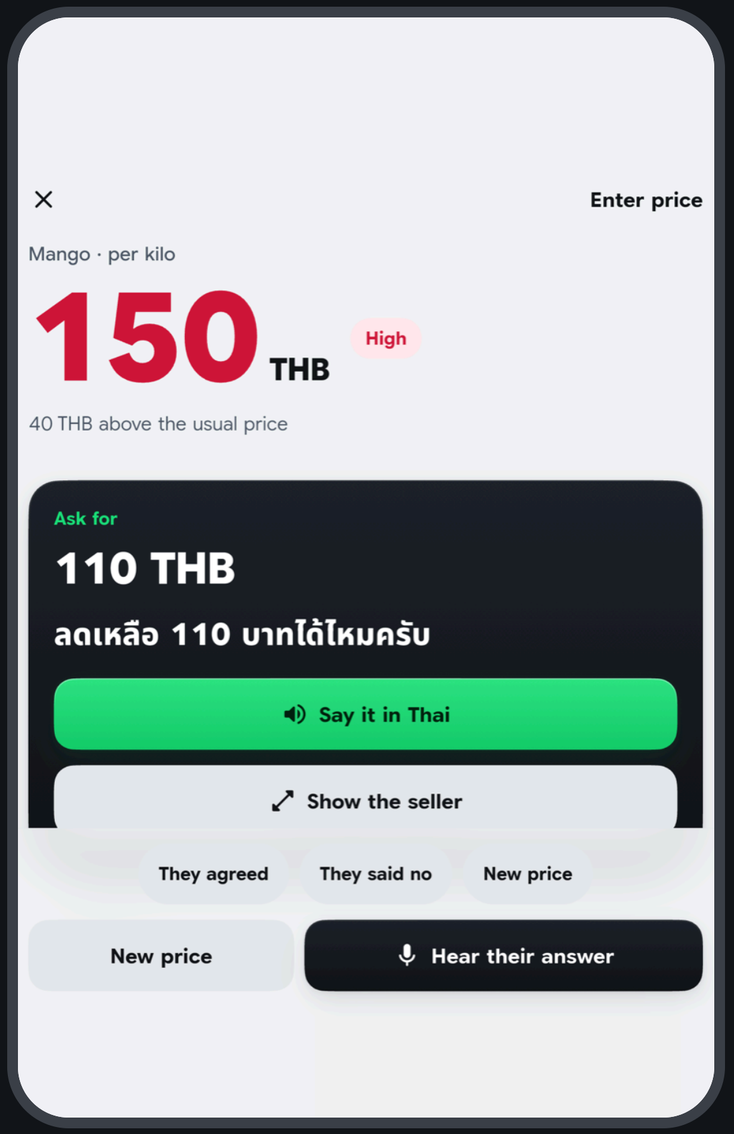

Camera view illustrated with the printed demo prop; result screen captured from the app.

THE AI HEARS THE SELLER

150 → 110

Heard in Thai. Judged. Answered in Thai.

Usual mango price 80–110 THB per kilo, October (checkraka.app, lotuss.com).
Items not on the list: web search, kept only if the quoted sentence is on the page.
Thai speech recognition in our test: 15 of 15 quiet, 14 of 15 noisy.

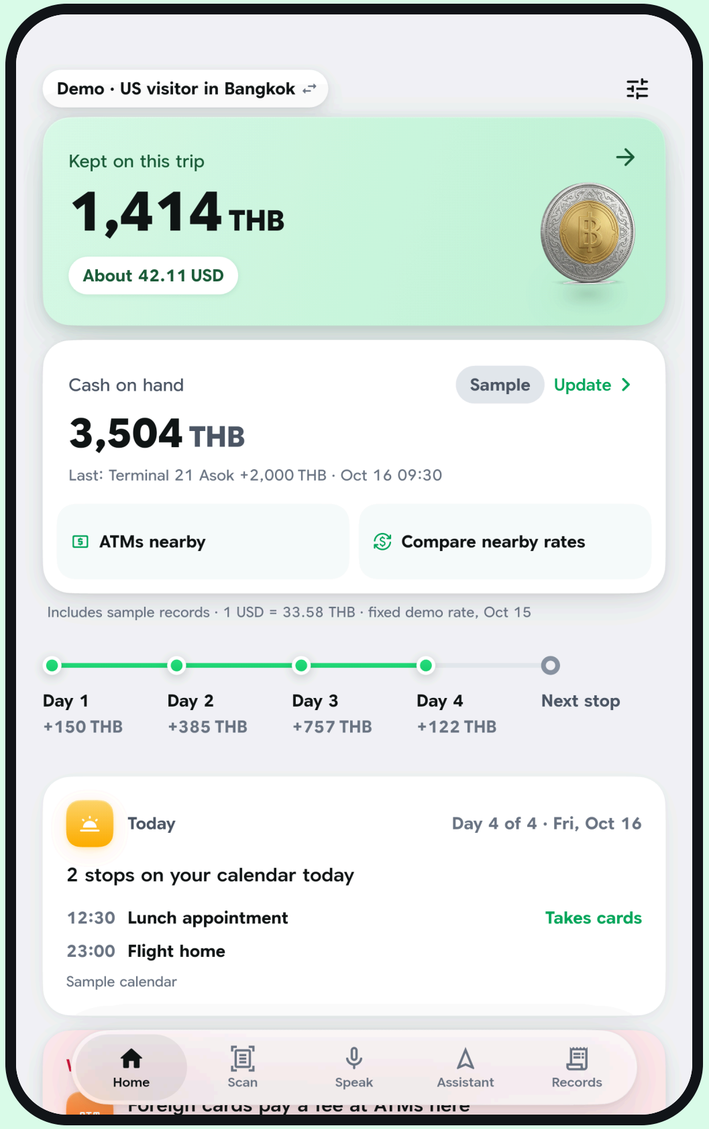

THE AI KEEPS COUNT

1,414 THB kept

On this trip. Includes sample records.

Cash on hand updates itself: ATM, cash haggles, cash bills. Not card payments. Nearby ATMs. Live exchange-counter rates (ThaiRate, CC BY 4.0, every 15 min).

THE AI READS A JAPANESE TERMINAL

494

THB saved

Baht or yen? Press F2. Pay in yen.

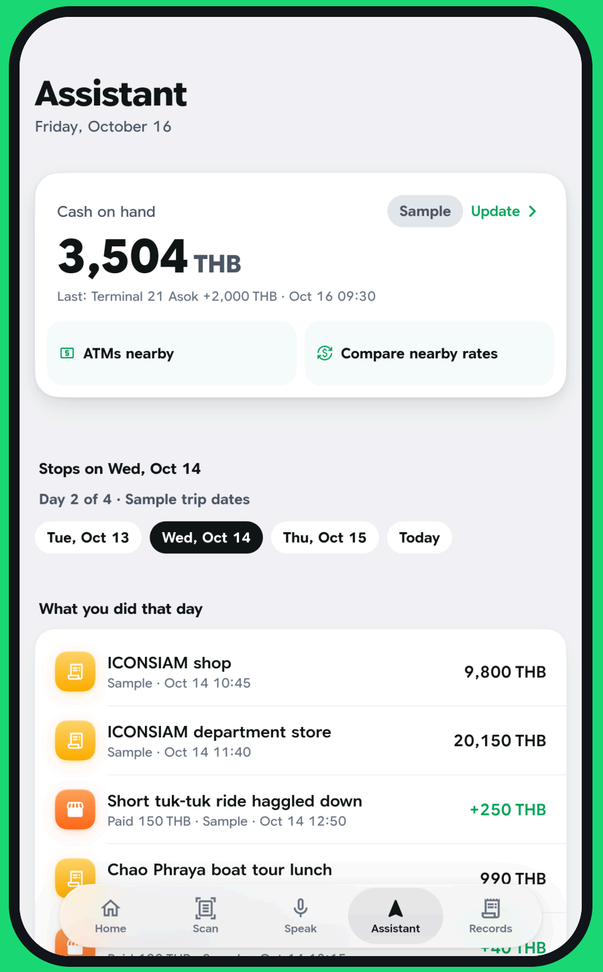

58,000 JPY, or 12,851.82 THB on the terminal. Demo rate 1 THB = 4.6935 JPY.

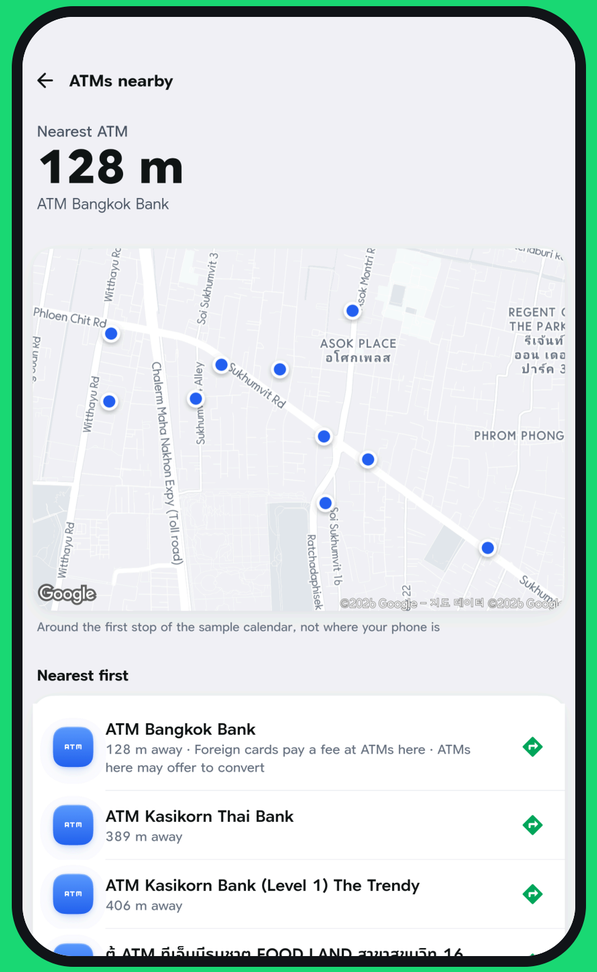

THE AI WARNS FIRST

A chatbot waits. We speak first.

Cash-only stops. ATM fees. New-country alert.

Phone first.
Cloud when it matters.

On the phone · instant, works offline

Text recognition · first guess at Thai speech

In the cloud · when it needs to think

Thai voice · Vision + Gemini · Maps · web search

Every number is calculated or quoted, never guessed. Information for your own decision, not financial advice.

NEXT

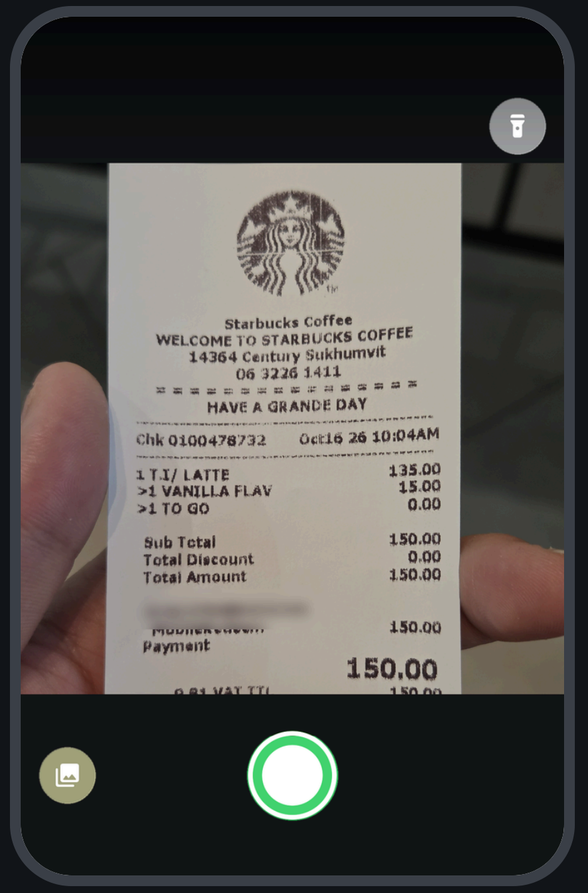

The Waze of money.

Every price a traveler pays improves the next answer.

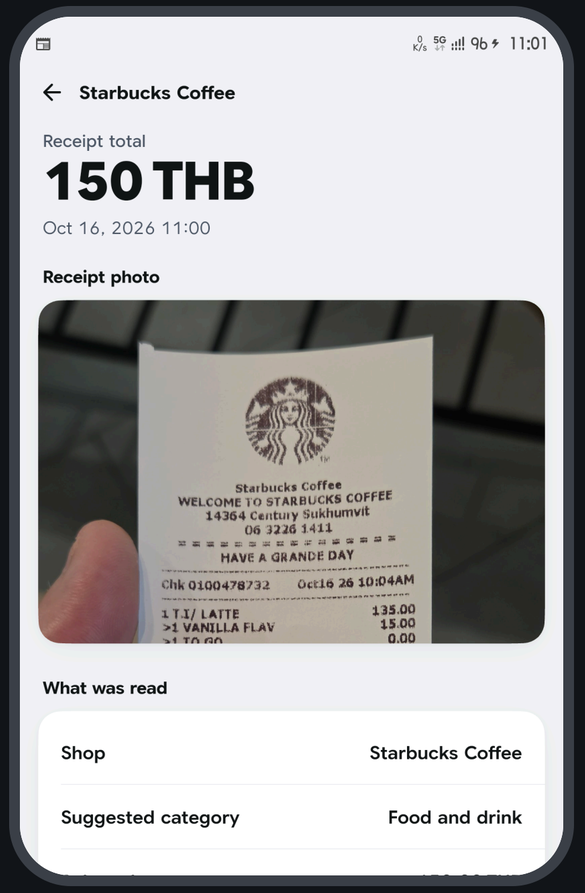

ONE MORE THING

The AI checks the bill.

Read. Add-up checked. Photo kept.

Camera

Result

Camera view illustrated with the receipt photo; result screen captured from the app.

WHO IT IS FOR

Visitors in Thailand.
Thai travelers abroad.

Seconds to decide. A screen in a language you don’t read. A few percent gone each time.

Bank apps	show the fee after you paid.
Currency converters	don’t read the ATM or terminal screen, or the bill.
Maps	tell you where to go, not how to pay.
Money Navigation	**reads the screen and answers before you press.**

WHY NOT AN APP YOU ALREADY HAVE?

Others answer when you ask.
We answer before you pay.

	Travel money apps Wise, Revolut	Maps & Translate	ChatGPT	Money Navigation
Which ATM / terminal button to press	No	No	If you upload a photo and ask; maths not checked	**Reads the screen on the phone, in seconds**
Is this bill right?	No	Translates the words	Reads it; can guess numbers	**Read, and the add-up checked**
Haggle in Thai	No	Translates; no price judgement	Typed; prices not sourced	**Hears the seller, sourced range, says it in Thai**
Cash on hand	Own card balance only	No	No memory of your payments	**From your ATM, exchange and cash records**
Cheapest way to pay here	Their own card's fees	Finds ATMs, not their cost	General advice	**Card, cash, ATM or counter, with sources**

PLAN · NOT BUILT YET, NO REVENUE YET

Free for travelers.

Partners	Card issuers and exchange counters appear as options, ranked by cost and labelled.
Premium	Extra trip features for people who travel often.
Scale	Rules are data files: a new currency pair is a new file. Japan is already in the demo.

Maps tells you which way to go. Money Navigation tells you which way to pay.

Six money jobs. One AI assistant.

Information for your own decision, not financial advice.
