

Money Navigation

One AI assistant for every payment abroad.

U-Hackathon 2026 · AI track · Bangkok

Who has used an ATM in Bangkok?

One button costs

246 THB

A 4,000 THB withdrawal. The ATM offers to convert it to dollars at its own rate, with a 5.50% mark-up printed on the screen.

Six money jobs, done by hand.

- Read the ATM screen
- Check the bill
- Haggle in Thai
- Find cash
- Compare rates
- Count what’s left

Not six apps.
One AI assistant.

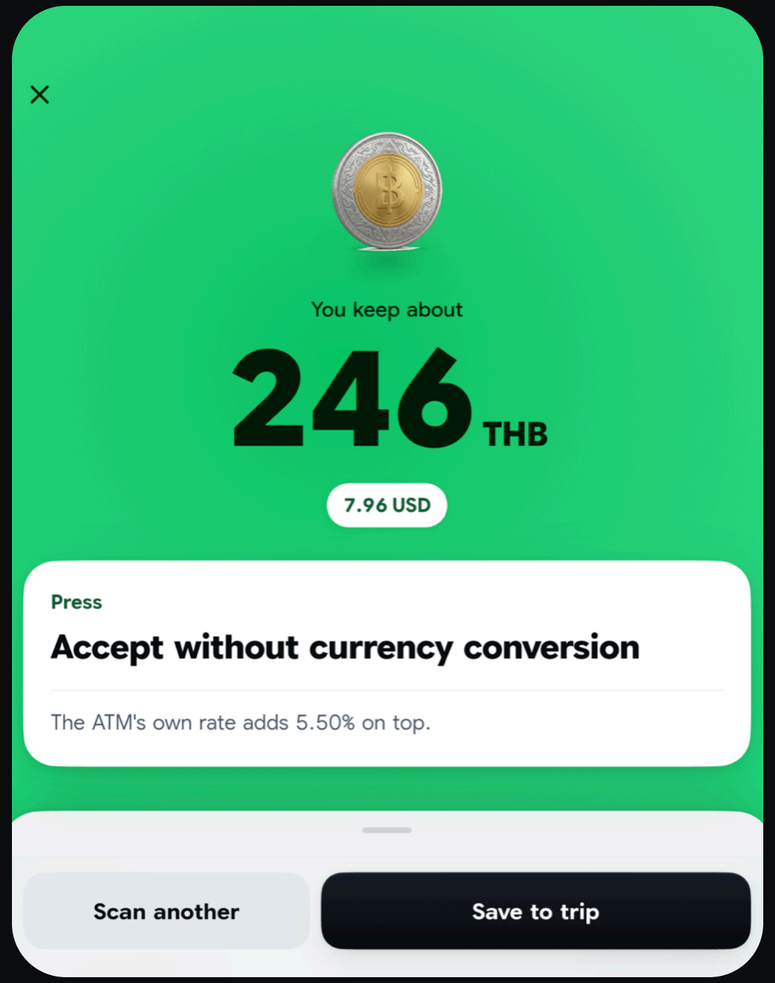

It reads, hears, checks and warns.

1 · The AI reads the ATM screen

246 THB

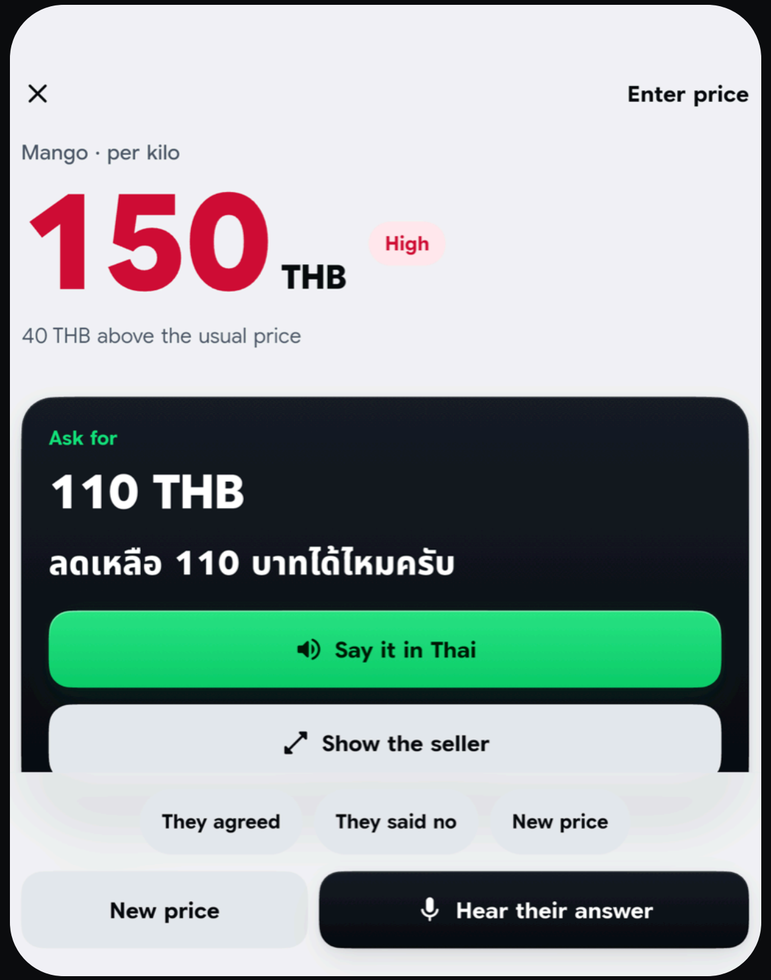

Text recognition on the phone reads the numbers.
Press “without conversion”.

2 · The AI hears the seller

150 → 110

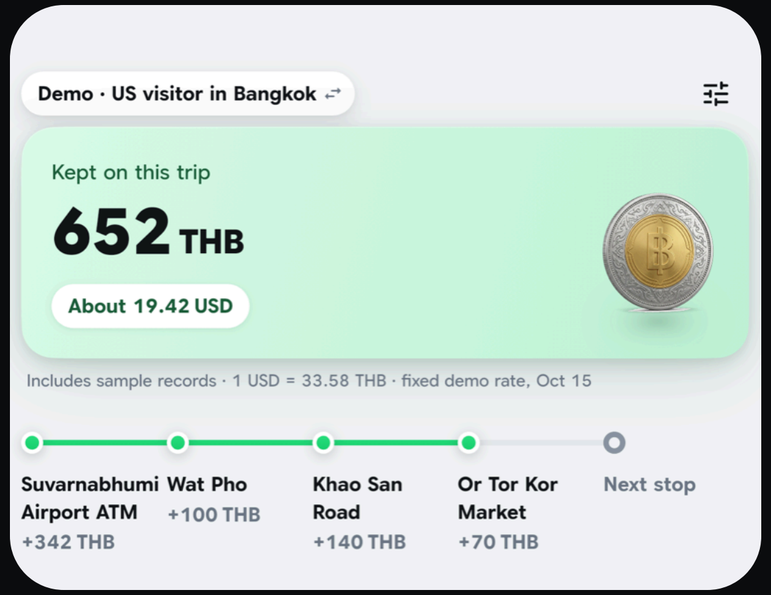

It hears the price in Thai, judges it,
and answers the seller in Thai.

Usual mango price 80–110 THB per kilo, October. Sources: checkraka.app, lotuss.com
Items not on the list: web search, kept only if the quoted sentence is on the page.
Thai speech recognition in our test: 15 of 15 quiet, 14 of 15 noisy.

3 · The AI keeps count

652 THB

Kept on this trip. Includes sample records.
Cash on hand updates itself:
ATM, cash haggles, cash bills. Not card payments.

Nearby ATMs with walking directions. Live exchange-counter rates near you (ThaiRate, CC BY 4.0, refreshed every 15 minutes).

4 · The AI reads a Japanese terminal

494 THB

The terminal offers baht or yen.
Press F2. Pay in yen.

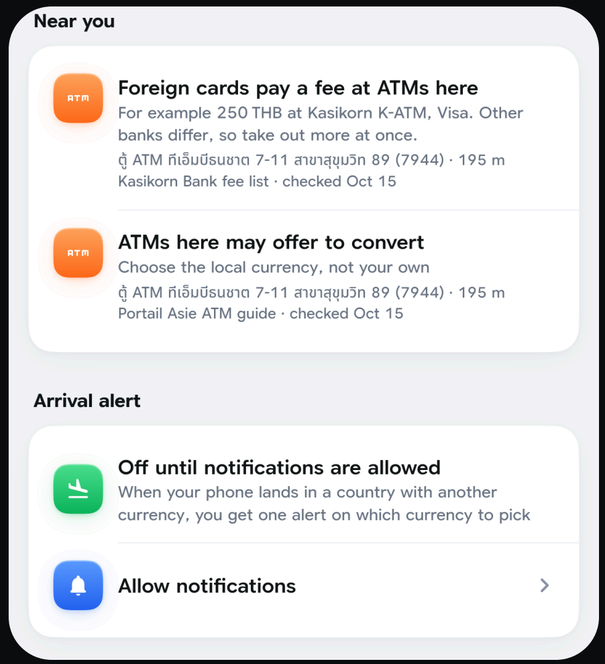

58,000 JPY, or 12,851.82 THB on the terminal.
Demo rate 1 THB = 4.6935 JPY.

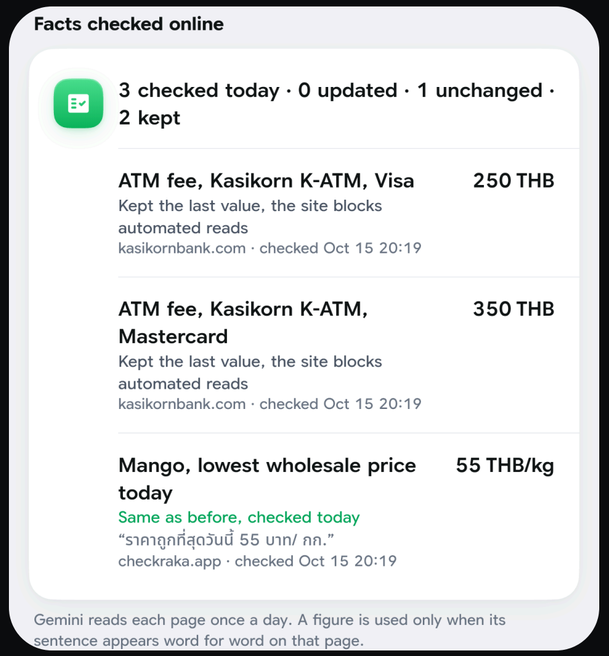

The AI warns first

A chatbot waits for your question. We speak first.

Calendar stops that take cash only.
ATM fees and conversion offers nearby.
One alert when you land in a new country.
Fees and prices re-checked online every day.

AI on the phone first.
Cloud AI when it needs to think deeper.

On the phone · instant, works offline

Text recognition (ATM, terminal)
First guess at Thai speech
Item name correction

In the cloud · when it matters

Thai speech recognition and voice
Google Vision + Gemini (bills)
Web search with quote check
Google Maps · ThaiRate counters

Every number is calculated or quoted from a source. Information for your own decision, not financial advice.

Next

The Waze of money.

Every price a traveler pays
makes the next traveler’s answer better.

One more thing.

The AI checks the bill.

Maps tells you which way to go.
Money Navigation tells you which way to pay.

Six money jobs. One AI assistant.

Information for your own decision, not financial advice.
